Professional Summary

Highly motivated and detail-oriented Frontend Developer with hands-on experience in building modern, scalable, and user-centric web applications. Proven ability to design, lead, and deliver full-scale frontend projects. Passionate about crafting clean code, intuitive user interfaces, and continuously improving through learning and contribution. Eager to join a forward-thinking team at a leading tech company such as FAANG to make a global impact.

Work Experience

Frontend Developer | Isab-Security.com

Tashkent, Uzbekistan - 3 months

- Developed the frontend architecture using React, Tailwind, and Ant Design.

- Managed and led the frontend development team to deliver security-focused UIs.

- Implemented responsive design for multi-device compatibility.

Freelance Frontend Developer

Remote - 4 months

- Delivered multiple client projects using React.js, Next.js, and modern UI libraries.

- Built reusable component libraries and optimized performance for production-level apps.

- Collaborated remotely with designers and backend developers using GitHub and Trello.

Education

Najot Ta'lim | Frontend Development

Completed 6-month intensive program focused on modern frontend technologies.

Personal Statement

I am driven by curiosity, growth, and a vision to contribute meaningfully to the digital world. My dream is to become a world-class developer, serve globally through technology, and be part of a team solving meaningful challenges. I am confident in my foundation, hungry to learn, and ready to grow into a high-performing engineer at a FAANG-level company.
